

ALPHAHEAT

PRODUCT DATA SHEET

Aluminium UFH foil

Insulating foil for underfloor heating - made with **modern technology laminate** of polyethylene film and metallized polypropylene film.

A **special print** (a grid of squares with a side of 10 cm) facilitates the installation of the heating system.

Thanks to its parameters, the aluminum foil constantly and evenly **reflects the heat** generated in underfloor heating systems.

Code	Name	Thickness [μm]	Colour
7-1050-050-03-04	Aluminium foil for underfloor heating, 50m	105	Silver
